Note: This index has been collated using WordPerfect 5 and Cardbox-Plus on an I.B.M. compatible computer. It comprises a small part of a much more comprehensive index which is far too long to be published in the Bulletin. Copies of this longer index are available from the author in various forms. It can be produced as either a WordPerfect 5 file, an ASCII file or as a paper printout. The computer readable output can be produced on either 3.5" 1.44 Mb or 5.25" 1.2 Mb diskettes.

In addition, a computerised index for all Bulletins from Vol. 1 No. 1 onwards is available. Enquiries should also be made to the author. This service also extends, at present, to some Derbyshire Archaeological Society publications and a few Geological Survey Memoirs.

The author would also be interested in hearing from anyone else with a similar pastime.
